1. Over view

1.1 Product Description

Hanhai - tech SD NAND are highly integrated flash memories with serial and random access capability. Can be use in the device which can support SD2.0 standard. It is accessible via a dedicated serial interface optimized for fast and reliable data transmission.

The purpose of product development is to make memory chips based on SD interface more stable and use scenarios more abundant. Han hai - tech SD NAND can match more MCUS withipstc1n (D)-0.737.7 (i)23t,2O9 (y)28.c 0.06.7 yau use(ps)-13ab 0 Tc 0 T
